

### Forecasting of Top 5 Products by Friday using Linear Regression method

This bar chart visualizes the top 5 products projected to lead in total check-in scores by Friday, based on **linear regression analysis**. The model was trained on performance trends from Week 1 when the check-in scores started, through to March 25th (Week 4 mid-week), and it predicted future scores using the trajectory of each product's growth.

- **ReconXi** is forecasted to maintain a strong lead with a projected score of **443.6**.
- **TechiesMatch** and **Backend.IM** follow closely, while **Telex** rounds out the top 5.

This visualization supports data-driven forecasting and helps anticipate performance for strategic planning or recognition.
